

PRIVACY POLICY

Last Updated: June 11, 2026

Appside Technologies LTD ("Company", "we", "us", or "our") operates the **AI Music & Song Generator** mobile application (the "Application"). We are deeply committed to protecting your privacy. This Privacy Policy explains our practices regarding data collection, transmission, and retention.

1. The Core Principle: Privacy Through Zero-Data Retention

Our fundamental privacy philosophy is that your personal data and creative assets belong exclusively to you. **To ensure and uphold absolute user privacy, we do not store, archive, or maintain any of your personal information, local files, prompts, lyrics, or generated music tracks on our servers.**

- **Local Storage & Backup Warning:** All user-generated inputs, text lyrics, and final audio songs are stored strictly and locally on your physical mobile device. Because we prioritize your privacy and do not keep a copy of your creations on our servers, **you are entirely responsible for backing up and saving your files.** If you uninstall the Application, clear app data, or replace/lose your device, your generated tracks will be permanently erased and cannot be recovered by us.
- **Real-Time Data Conduit:** When you initiate a song generation request, the necessary text prompts, lyrics, and style choices are routed through our servers to communicate with our AI Providers. This process is treated as a secure, real-time data conduit. The data is cleared instantly from our server memory as soon as the API response is delivered back to your device.

2. Information Handled by Third-Party Services

While we do not store your data on our own infrastructure, the Application integrates industry-standard third-party Software Development Kits (SDKs) and APIs to enable functionality, analytics, and subscription fulfillment. These providers collect and process data according to their own privacy policies:

- **AI Generation Providers (MiniMax, Replicate & Kie AI):** Text prompts, selected genres, vibes, and lyrics are processed by these providers solely to generate the requested audio outputs. Please be aware that while the Company does not store your data, certain third-party AI Providers (such as MiniMax operated by Nanonoble Pte. Ltd.) explicitly state in their terms that they may use inputs and generated content to train, develop, and improve their AI models and algorithms. By using our Application, you consent to your inputs being processed by these third parties under their respective privacy frameworks.
- **Subscription Management (RevenueCat):** Used to track and manage subscription statuses, credit allocations, and purchase history. RevenueCat

processes transaction details via anonymous or pseudonymous tokens provided by Apple.

- **Analytics and Performance (Firebase & Google Analytics for Firebase):** We use these tools to collect non-personally identifiable information, such as app crash logs, device models, operating system versions, and generalized usage statistics (e.g., number of songs generated) to help us optimize app stability and performance.

3. Device Permissions

To provide the core features of the Application, we may request certain permissions on your device, such as:

- **Storage/Media Library Access:** To allow you to save the generated music tracks or lyrics directly onto your device, or to upload custom text/lyrics files.
- **Notifications:** To notify you when a background music generation task is complete or to inform you about credit updates (only if you explicitly grant permission).

4. Data Security

Because your inputs and generated music files are stored locally on your device, the security of your content relies heavily on your device's built-in security features (passcodes, biometrics, and secure sandbox environments). We secure the transmission of data from your device to our third-party AI Providers using encrypted industry-standard protocols (HTTPS/TLS).

5. Children's Privacy

Our Services are not directed to individuals under the age of 13. We do not knowingly collect personal information from children. Since we do not collect or store any personal data on our servers from any users, we do not intentionally possess data belonging to children.

6. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy within the Application and updating the "Last Updated" date at the top of this policy.

7. Contact Us

If you have any questions or concerns regarding this Privacy Policy, please contact us at: **Appside Technologies LTD** Email: support@appside.app
